

Multifunctional water purification filters Krilico MS

Classic Krilico MS multifunctional units consist of separate filter housings with ion exchange resin and a salt tank. They are used for high water consumption, mainly in industry or commerce. During the rinsing (regeneration) of individual such units, the water flow to the consumer is cut off or supplied with the original quality. For continuous water supply to the consumer, several such units are mounted in parallel or continuous action softeners of the Krilico MD series are used.

The system is used for water purification in homes, offices, industrial use, as well as for heating and power systems. This system is designed to remove iron, manganese, calcium and magnesium carbonates, hydrogen sulfide, ammonia, and other organic compounds in a single stage.

The presented filters have digital control. Regeneration initiation is freely programmable based on:
the volume of purified water, time, or whichever comes first.

Supply kit:

1. Filter housing;
2. Flow distribution system (distributor);
3. Ion exchange resin of various characteristics;
4. Control valve included;
5. Salt tank;
6. Product passport and operating instructions.

Acceptable quality indicators for the source water:

- Hardness - 15.0 mg-eq/l
- Iron - 15.0 mg/l
- Manganese - 3.0 mg/l
- Oxidizability - 5.0 mg O₂/l
- Ammonium - 4.0 mg/l

Before purchasing, we recommend consulting with a specialist.

Multifunctional water purification filters Krilico MS

Krilico MS	1035	1054	1044	1054	1248
Nominal performance, m ³ /h	1,2	1,8	1,8	1,8	2,6
Maximum performance, m ³ /h	1,5	2,3	2,3	2,3	3,3
Maximum softened water volume between regenerations at a hardness of the source water of 15°d *	0,84	1,17	1,49	1,73	2,10
Resin volume, liters	18	25	32	37	45
Ion exchange resin capacity, m ³ x °d	12,6	70	89,6	103,6	126
Connection diameter, Inlet/Outlet/Drain, inches	1/1/3/4	1/1/3/4	1/1/3/4	1/1/3/4	1/1/3/4
Average salt consumption per DownFlow backwash, kg	1,8	2,5	3,2	3,7	4,5
Water volume per backwash (no more), l	201	236	436	441	564
Backwash intensity, m ³ /h	0,52	0,81	0,81	0,81	1,17
ΔP at nominal flow rate, bar	0,5	0,5	0,5	0,5	0,6
Dry weight, kg	23,9	29,9	35,8	40,1	46,7
Salt tank capacity, l	60	60	60	70	70
Overall dimensions, WxDxH, mm	614x390x1096	664x390x1096	664x390x1325	664x390x1579	715x390x1427
Salt tank dimensions, WxDxH, mm	390x390x810	390x390x810	390x390x810	390x390x810	390x390x810
Catalog number	MS0835-C	MS1035-C	MS1044-C	MS1054-C	MS1248-C

* When the content of Fe and Mn in the source water does not exceed the maximum permissible level.

Key features of the Krilico MS water softening installations:

- Water operating pressure: 2.5 - 7 bar
- Power supply: 120V AC - 220V AC, 50-50 Hz
- Output electrical power supply: 12V AC
- Water operating temperature min./max.: 3-40 °C
- Ambient temperature: 2-45 °C
- Protection class: IP44

For ease of installation and operation, we recommend purchasing:

- Flexible hoses for connection M-F 1" L=80 cm
- 25 kg package of salt tablets
- Water hardness test – Aquatest

Set of flexible hoses for quick and flexible connection

Connection type: M - 1" F - 1"
disconnectable

Length: 80 cm

Maximum pressure: 10 bar

Catalog number: FH1-80

Salt tablets for regenerating water softening installations

Packaging: 25 kg

Catalog number: Slt25-01

Express test for determining water hardness

Very convenient to use, allows for easy and quick data retrieval. The tester has a measuring range from 1 to 40 °dH.

The number of measurements depends on the specified water hardness.

Catalog number: AT0101
